Forecast for Monday 26 Jun 2023

Weather: Any mist and cloud patches on western slopes will soon clear, leading to a fine morning with showers then developing slowly from the west. These will be mostly light and well scattered but the odd heavier one cannot be ruled out, especially in western parts. Showers should however become fewer and lighter as the afternoon progresses, leading to a fine and dry evening.

Chance of cloud-free hill tops above 800m: 90% or more.

Low Cloud and visibility: Mediocre at height locally, mostly in the far west, with cloud as low as 550-600m, but quickly improving to become very good or excellent with uninterrupted panoramic view. Some temporary reductions are possible in and around any showers though.

Valley	13/12	14/12	16/14	17/14	16/14	15/13	14/13
Freezing Level*	1800m	1800m	1800m	2000m	2100m	2200m	2500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Sun protection highly recommended, with high UV levels expected. Also feeling noticeably cooler than recent days, particularly on hill tops.

Forecast for Tuesday 27 Jun 2023

Weather: Becoming increasingly cloudy with patchy light rain and drizzle spreading east across the park during the early hours of Tuesday, some heavy bursts at times during the morning. The rain will tend to ease in the afternoon but will give way to extensive low cloud, with visibility becoming very poor at all heights. Also windy with a persistent south-westerly wind, making any long walk unpleasant for the untrained.

Maximum wind: South-westerly 15-20mph with gusts 25-30mph

Chance of cloud-free hill tops above 800m: 30% becoming 5% by lunchtime.

Low Cloud and visibility: Generally poor throughout, with neighbouring hills barely visible by the end of the morning and cloud gradually lowering from 600m to 300m.

Temperature: **Valleys:** Plus 15 Celsius rising to Plus 20 Celsius
At 800m: Plus 09 Celsius rising to Plus 14 Celsius
Freezing level: Well above summits
